

# About us

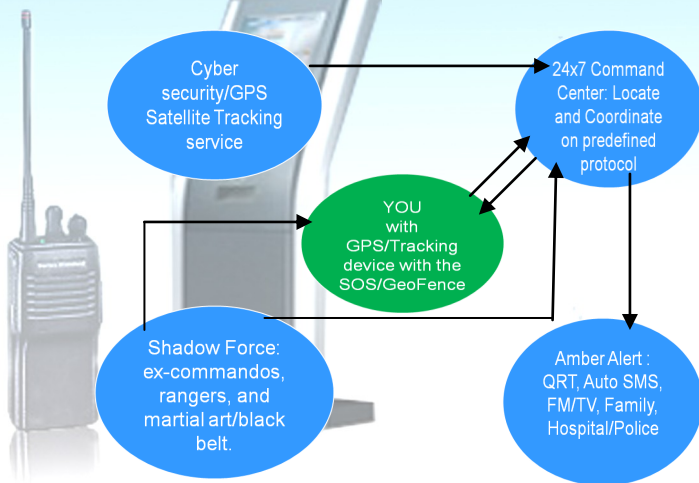

Gforce Security started providing security services in 2004 and has expanded to Gforce Systems & Technologies to enhance our capabilities to provide integrated security service to our clients. We are a firm based in Kathmandu that is committed to delivering excellent Security services throughout Nepal. The security team combines dedicated and capable security personal, shadow force, QRT and state of the art technology to provide security services.

Gforce has gained a reputation for its quick response time. It is a rapidly expanding company that aims to maintain its reputation.

Our team is a group of senior professionals consisting of some of the most respected names in the Cyber Security/surveillance Systems in the United States as well as Nepal Army and Armed Police Force of Nepal.

## Integrated Security Services

## 24x7 Command Center

Gforce employs state of the art passive infra red monitoring devices for perimeter security. It is integrated to our **Central Monitoring Station** to provide constant surveillance, analysis and coordination. You can be rest assured that with our stable and reliable CMS system, your property is safe. With Gps enabled devices we can extend our service to provide geofencing solutions for mobile agents.

We procure devices and utilize platforms with the belief that they should be easily integrable into highly effective system

## CCTV

To aid the effectiveness of the security team Gforce also utilizes CCTV to monitor any vulnerable area of the premises in real time. In addition we can also provide any type of sensor equipments such as vibration sensor, infra red, microwave sensors, fingerprint assess and also facial recognition systems.

## Lock Down And Armed Systems

Highly valuable assets can also be fitted with lock down devices that will automatically shut all doors on activation of any of the sensors. Once Armed these devices will provide constant monitoring of the premises.

## GPS/Satellite

Gforce has partnered with an American company to provide the latest GPS/satellite tracking technology to enhance our services. GPS is a U.S. space-based global navigation satellite system. It provides reliable positioning and navigation services to worldwide users on a continuous basis in all weather, day and night, anywhere on or near the Earth. With the addition of Global information service, GPS enabled devices can be utilized to provide **Web Based services** which is a combination of a device and a website that can track valuable asset/cash bag, child or businessmen in real time and report this location on a website to any authorized user in the world.

## QRT Set

- This Device has a built in mobile phone and GPS/Geofencing function. The unit can call our Command Center and connect to people who can answer questions and further connect to the right QRT to handle your security situation.

## Life Saver Devices

- Monitor real time location of the wearer and when activated sends sos /panic signal to our command center and alerts our shadow force and QRT teams
- Monitor Cash hauling bank to bank

## Vehicle Tracking

- Geo-Fence will transmit alerts to our Command Center through sms or email when you/vehicle or guard leaves or enters a predetermined area.
- Track your Vehicle or Cash Bags, financed motorcycles or automobiles.
- Disable ignition remotely or alert over-speed or stopped location.

## COSTUMIZATION

We customize our services/technologies to meet the particular needs of business in Nepal. Service in Nepal such as Bank, financial institutes and Security Agencies have varying requirements. We provide customized solutions based on our current technologies, devices and shadow force for VIP security, cash carrying, motorcycles/automobiles, important shipments and many more!
